Report from the International Neutrino Commission meeting

Santa Fe, NM, 17 June 2006

J. Schneps
George Marx, the organizer of the 1st International Conference On Neutrino Physics and Astrophysics

**NEUTRINO 1972**

established the Int. Neutrino Commission in order to insure the continuation of this series and to decide the format, coverage, and size, to guarantee the quality of the conferences, and to choose the organizers and venues for future neutrino conferences. The Committee also supports the WIN workshops in odd years. It consists of all those who have organized a previous Neutrino Conference, so there ought to be at least 22 members, but many are no longer active, so, in practice, there are ~ 12 of us.
Attending the INC meeting of June 17, 2006:

Sandip Pakvasa  NEUTRINO 1981
Jack Schneps (chair)  NEUTRINO 1988
Yoichiro Suzuki  NEUTRINO 1998
Art McDonald  NEUTRINO 2000
Franz von Feilitzsch (vice chair)  NU 2002
Norbert Schmitz  NEUTRINO 2002
Francois Vannucci  NEUTRINO 2004
Daniel Vignaud  NEUTRINO 2004
Tom Bowles  NEUTRINO 2006
Herbert Pietschmann  WIN
Today, there is a proliferation of workshops and conferences dealing with neutrino physics. This is a sign of the interest and excitement the field has generated. George Marx showed unusual foresight when he established this series in 1972, but even he couldn’t have imagined the extraordinary development the field would undergo. So, every two years we come together in NEUTRINO---- to review our field, exchange ideas, and point the way forward.
Committee Agenda

1. We received a report from Tom Bowles on NEUTRINO 2006 and congratulated him and the Organizing Committee for an excellent and memorable conference on the 50th anniversary of the discovery of the neutrino.

2. The committee reviewed the planning for NEUTRINO 2008 as presented to us by Jenni Adams, Stephen Parke, and Gary Hill. We discussed organization, siting, costs, and yes - excursions.

3. We listened to excellent proposals for NEUTRINO 2010 from George Tzanakos (Athens) and Ken Long (London), and for NEUTRINO 2012 from Gary Feldman (Boston) and Yoichiri Suzuki (Japan).

4. We discussed issues concerning conference format, etc.
DECISIONS:

**Affirmed:**

NEUTRINO 2008  
Christchurch, New Zealand, May 26 - 31  
Jenni Adams, Francis Halzen, Stephen Parke  
To be followed by Neutrino Theory Workshop in Melbourne, Australia (Ray Volkas)

**Decided:**

NEUTRINO 2010  
Athens, Greece, June 14 - 20  
George Tzanakos
DECISIONS, contd:

Decided; to be affirmed in 2008:
NEUTRINO 2012
Kyoto, Japan, June dates to be determined
T. Nakaya, Y. Suzuki

Tentatively decided:
NEUTRINO 2014 in North America

Not decided yet:
NEUTRINO 2030 (Pauli centennial)
NEUTRINO 2056 (Neutrino discovery centennial)
WIN workshops

WIN 2007  Saha Inst. of Nuclear Physics, Kolkata, India  
15 - 20 January 2007; N. Mondal & K. Kar

WIN 2009  Gran Sasso, Italy (tentative)

WIN 2011  Capetown, South Africa (tentative)

Reminder:

NUFACT06  Irvine, CA, USA; 24 - 30 August 2006
See <nufact06.physics.uci.edu>
The Committee is very interested in your opinions and advice on the organization of future NEUTRINO conferences. We will be discussing such matters in the near future. Please email me at jacob@minos.phy.tufts.edu, or any other commission member.

FINALLY, WE HOPE TO SEE YOU ALL AGAIN AT NEUTRINO 2008!
Neutrino 08
Christchurch, New Zealand
May 26-31

University of Canterbury
